Save Orcas Safe

Dear Sir / Madam,

I'm writing to tell you about the Orcas that are being kept in captivity at Sea World. I'm offering you a chance to save these poor animals. It won't even cost you a penny, just a few minutes of your time to just sign a piece of paper. SOS, Save Orcas Safe.

Let's work together to shut Sea World down, this is an amusement park. If you don't know what Sea World is it's a theme park where whales are forced to do tricks, and they give people more space to park their whales. IT'S HORRIFIC!

Do you know what whales do when they're not performing? Are you really going to let these poor creatures die? Would it even matter to you, if your child was taken away from you and forced to do tricks? As the tanks are tiny, the whales are unsafe and the trainers are just covering up their burn. In 1965, the first ever whale was caught in San Diego, name Shamu when she was stolen from her family a hunter called Ted Griggins killed her mum right in front of her. If the whales have a bent fin, it's called a collapsed dorsal fin, the trainers say it's normal but it is not, it's unhealable for the whales. If the whales get sunburnt the trainers cover it up with ink so that people don't know. Do you know whales get badly sunburnt because the tank is so shallow but they get 95 percent less
